VEGETABLES - PROCESSING

ANNUAL SUMMARY

1958

Production of the 10 principal vegetables for processing in 1958 is about 10 percent above last year and 19 percent above average, the Crop Reporting Board announced today. This year's production of 7.46 million tons compares with 6.81 million tons produced last year and an average of 6.25 million tons for the preceding 10-year period. It is nearly 11 percent less than the 1956 record large aggregate production of 8.38 million tons.

In 1958, 1,617,250 acres of these 10 crops were harvested. Acreage harvested this year was 7 percent less than in 1957 and 8 percent under average. However, the yields obtained in 1958 exceeded last year's yields for green lima beans, snap beans, kraut cabbage, pickling cucumbers, green peas and tomatoes. Asparagus for processing, canning beets, sweet corn and spinach were slightly below the 1957 yields of these crops. All crops except asparagus for canning and freezing yielded better than average.

Processing tomato tonnage this year, estimated at 4,257,700 tons, practically equaled the record large 1951 crop of 4,258,000 tons. Snap bean production of 365,800 tons exceeded the previous 1957 record large production of 361,300 tons by only 1 percent. Kraut cabbage production of 205,900 tons exceeded by 21 percent the 1957 production of 170,400 tons but has been exceeded as recently as 1956 when 258,900 tons were cut for sauerkraut.

Of the seven remaining crops, the estimated 1958 production of asparagus for processing was 3 percent less than last year's tonnage, green lima beans, and cucumbers for pickles were 4 percent less, beets for canning 9 percent less, green peas and sweet corn 13 percent less and spinach 12 percent less than in 1957. All crops except green lima beans and sweet corn for processing were above average.

The value of the 10 processing vegetables is 280.0 million dollars. This compares with 271.6 million dollars for 1957 and 250.7 million dollars for average.

The rank of the leading States growing processing vegetables is shown below:

Rank	Acreage		Production		Value	
	State	Percent of total	State	Percent of total	State	Percent of total
	1	:Wisconsin	16.1	:California	37.8	:California
2	:California	14.7	:Wisconsin	8.0	:Wisconsin	8.4
3	:Minnesota	8.3	:New York	5.0	:Oregon	6.6
4	:Washington	6.3	:Illinois	5.0	:New Jersey	5.7
5	:Illinois	6.0	:Minnesota	4.8	:New York	5.1

This report was made possible by the co-operation of vegetable processors who provided basic statistics concerning their operations. Supplementary information was supplied by State Agricultural Statisticians and cooperating agencies.

Summary of harvested acreage, production and value of principal processing vegetables,

United States, average 1947-56, annual 1957 and 1958.
